

Cherry Zhang

<http://cherryzhang.net> | y68gzhan@uwaterloo.ca

Education

University of Waterloo

Candidate for BaSc. in
Mechatronics Engineering & Minor
in Computer Science

Expected May 2018 | Waterloo, CA

Cum. Average: 91.2%

Engineering Dean's List (Ranked 4th in
class of over 130)

List of Courses: [here](#)

Online Profiles

Github:// [phantomkirby](#)

LinkedIn:// [cherryzhang1995](#)

Skills

Software/Embedded

Experienced:

Java • Android • C#

Familiar:

Arduino • C++

Basic:

MATLAB • SQLite • VBA • HTML •

JavaScript • CSS

Computer Aided Design

Basic AutoCAD & SOLIDWORKS

Languages

Fluent in English

Basic Japanese, Chinese and French

Other

Technical Writing

UI/UX Design

Research

Work Experience

Microsoft Software Engineering Intern

May 2015 – August 2015 | Tokyo, JP

- Worked on Office Lens, and image processing app that can scan documents, whiteboards, etc. on your mobile device with real-time edge detection
- Worked with making the app from scratch on Universal Windows 10 Platform, from everything including: camera, orientation sensors and rotation & other animations, integration of image processing libraries into the app, optimization of the speed of image processing and the speed of the real-time edge detection, utilizing different video and photo capture resolutions, concurrency, memory optimization and management, image encoding/decoding, OneNote service integration, etc.

Microsoft Software Engineering Intern

November 2014 – December 2014 | Tokyo, JP

- Designed and Implemented various algorithms and a data structure for organizing and generating suggested albums based on photo metadata
- Improved the UI and UX experience on the Android client application, creating custom gesture features and ui elements.
- Implemented other various experimental features for the Sway application

Imaggle Android Developer Intern

August 2014 – October 2014 | Tokyo, JP

- Imaggle is a startup that developed a app for an online clothing market place
- Developed the Android version of the iOS app, and worked with the founder regarding core decisions for the product design
- Functioned as the Android team lead for coordinating tasks and development activities

Research

University of Waterloo Part-Time Research Assistant

Expected September 2015 – December 2015 | Waterloo, CA

- Expected to continue last research assistantship during the Fall 2015 study term; improving the current research paper, refining rehabilitative techniques, and implementing learning algorithms/heuristics and data analytics into the current application.

University of Waterloo Research Assistant

January 2014 – April 2014 | Waterloo, CA

- Developed an Android mobile app to assist the rehabilitation of people who have suffered a specific type of stroke (reading disorder - alexia sans agraphia)
- Researched and read known literature of attempted rehabilitative techniques and their efficacies; summarized these findings in a research paper
- Independently responsible for the entire software life cycle: research paper on problem, functional specification, design specification, code development, test process, user manual, validation with stroke patient (documentation exceeded 100 pages)

Volunteering

Hackathon/Ideathon Workshop Mentor (2014, 2015)

- available 24/7 at two DMTC Japanese hackathons to help with Android hacks
- mentor at ideathon hosted by Microsoft to promote women in STEM fields

Volunteer at University of Waterloo (2014)

- exposing teenagers to engineering, with several meetings with other coordinators, and programmed a short game to teach teenagers basic optimization

Volunteer at MommyCare (2014-2015)

- volunteering and maintaining web application for startup that helps working women in Japan

Hobbies & Interests

Blogging

- I've blogged about the basics of edge detection, knapsack problem, asymmetric cryptography, but also art, philosophy, and video-games

Independent Learning

- I enjoy doing independent learning on various mathematical topics such as machine learning, bayesian networks, etc.

European History and philosophy

- Frequently either blog or independently read about what I learn

Real-time strategy video games

- Mostly MOBAs including League of Legends, DOTA 2, and Heroes of the Storm

Side Projects (Full List on my Website)

- HTML Parser (created the parsing algorithm while learning coding)
- Bluetooth System that Prevents Harassment on Japanese trains (Top 5 in TechCrunch Japan Hackathon 2014)
- Multi-Platform Android Fitness Application (with ChromeCast, Mobile, and Wear) (finalists at JPHacks 2014)
- Diagnostic/Rehabilitative Android Health App for Feet Problems (using a sock with pressure sensors and accelerometers, and Pebble Watch as a notification receiver) (PennApps Hackathon 2015)

Extracurriculars

RoboGals - Mentor and UW Branch Founder

June 2015 and onwards | Waterloo & Tokyo

- Creating a local Waterloo branch of the international volunteering organization that helps promote girls and young women to pursue engineering
- Volunteered at the Tokyo branch in Spring 2015 during my internship in Japan; helped organize the event, and was a mentor for the girls and young children, teaching them Lego Mindstorms

University Life Workshop Director

May 2015 and onwards | Waterloo

- Organizing a workshop to help first year engineering students get accustomed to their busy university life, and balancing their time between studies and internships

Engineering Mental Health Director

May 2015 and onwards | Waterloo

- Interviewing and writing articles of fellow engineering students' stories about their struggles and hardships at Waterloo
- Organizing several events for Mental Health Awareness week, which includes: TedTalks videos addressing mental health issues in society, raising awareness of regional mental health services, anonymous submissions of peoples' struggles, and etc.

Engineering Peer Tutoring Program

April 2015 and onwards | Waterloo

- Initiated a peer tutor program so struggling engineering students can get help from fellow peers
- Leading the project, starting with the upcoming 2B term for the mechatronics class of 2018.

Awards

2015	President's Research Award ($\geq 80\%$ avg. & research assistantship on study term)
2014	International Experience Award ($\geq 80\%$ avg. & international internship)
2013	President's Scholarship of Distinction (entrance average of $\geq 95\%$)
2013	Dr. B. Mabel Dunham Award (Highest Average in High School among Females)
2011	Business/Entrepreneurship Award (for Computer Science Studies in High School)
2011	Gold Medal in Waterloo Science and Engineering Fair for Biotechnology
